Re: Change in Methodology and Reference range for Urinary Free Cortisol (UCOR)

Dear Colleague,

Our referral lab has informed us that with immediate effect there will be a change in reference range for Urinary Free Cortisol Testing (UCOR)

This is because of change in analyser platform from Roche to Abbott as Roche has now suspended this test.

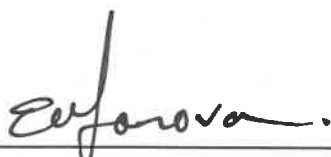

There will be no change in sample requirement, Handling or TAT.

Please find below new reference range with other essential information.

	OLD Method	NEW Method
Methodology	ECLIA	CMIA
Analyser platform	Roche E170	Abbott Architect
Reference range	99 – 378 nmol/24h	<486 nmol/24h

If you would like additional information regarding this test please do not hesitate to contact us on 1800 303 349 or email us at info@medlabpathology.ie.

Yours sincerely,

Dr Eibhlís O'Donovan – Medical Director
