Re: Notification of Delay in BoBs Testing in Products of Conception (PROC) Samples

Dear Colleague,

Our records indicate that you have ordered genetic testing with us in the last 12 months.

Unfortunately, our Referral Laboratory have been in touch to inform us that due to supplier issues, a molecular assay using the KaryoLiteBoBs (BACs-on-Beads) Kit used to detect whole chromosome aneuploidy is currently not available.

We have been told that once the kit becomes available any delayed samples will be processed urgently.

You will receive interim results informing you if a sample you have sent has been affected by the delay.

We do not yet have a date when this may be resolved but we will endeavour to update you when we have further information.

Please accept our apologies for the inconvenience this will cause to you and your patients.

If you would like additional information regarding this test please do not hesitate to contact us on 1800 303 349 or email us at info@medlabpathology.ie.

Please do not hesitate to contact me with any further queries you may have.

Yours sincerely,

Jade Stanford
Head of Client Services & IT Projects
